

BTC Operating System Quick Reference

Version v1.1.1

Use this as the weekly desk reference

This quick reference is for customers who already completed Start Here and want the operating surface in one place.

Indicator page: AZRO Systems - BTC Operating System (Invite-Only)
Product / access page: AZRO Systems Gumroad
Support: support@azrosystems.com

Chart standard

Item	Use
Host chart	BITSTAMP:BTCUSD
Timeframe	1W
Candles	Regular candles
Decision clock	Confirmed weekly close only
Recordkeeping	Companion Tracker

Core inputs

Input	Plain-English meaning
Weekly budget	Recurring amount assigned to the BTC plan each week.
Cash at Start date	Cash available at the start of the current chapter.
BTC already owned	BTC already inside the plan at the chapter start.
Start year / month / day	The candle date where the current chapter begins.
Strategy and Risk level	The written policy profile you intend to follow.

Dashboard views

View	Use it when
Detailed	Default full desktop view; best for normal weekly review.
Simple	Quick-read view when you only need the core action surface.
Mobile	Compact phone view when screen space is limited.

Alert path quick pick

Need	Use
Exact weekly guidance off-chart	Any alert() function call, Once Per Bar Close.
Simple weekly reminder	Weekly Update, Once Per Bar Close.
Rare major review reminder	Major Cycle Event, Once Per Bar Close.
No extra notifications	Manual dashboard review after confirmed weekly close.

One-line rule

Stay boring on purpose

Same chart, same timeframe, same chapter inputs, same review clock, same tracker discipline. Change the chapter only when the real plan changes.
