

XRP Top/Bottom Indicator Support & Troubleshooting Card

Version v1.4.4

Fastest way to solve most issues

Before contacting support, check timeframe, chart type, access account, current alert conditions, and whether a health notice is visible. Most issues become obvious after those five checks.

Indicator page: AZRO Systems - XRP Top/Bottom Indicator (Invite-Only)
Product / access page: AZRO Systems Gumroad
Support: support@azrosystems.com

Fast checks

Issue	What to check first	What to send if unresolved
Indicator not visible	Confirm you are on the correct TradingView account and that invite-only access was granted.	TradingView username, screenshot of invite-only access page, and chart screenshot.
Alerts did not fire	Confirm 1W timeframe, correct condition, Once Per Bar Close, and that the alert was recreated after updates/input changes.	Alert name, condition, trigger, chart screenshot, and exact alert time.
Labels look wrong	Confirm chart is BITSTAMP:XRPUSD on 1W regular candles and health notices are clear.	Full chart screenshot plus indicator settings screenshot.
Health notice visible	Read the banner first. It may mean wrong chart, wrong timeframe, degraded reference data, or paused confirmations.	Screenshot of the notice and the chart symbol/timeframe.
Weekly Plan looks off	Check Plan mode, Safety pace, Weekly budget, Start cash, Start XRP, Start XRP avg cost, and Start date inputs.	Dashboard screenshot and plan-input screenshots.

Include this in every support email

- Your TradingView username, chart symbol, and timeframe.
- A full chart screenshot and indicator settings screenshots.
- If it is an alert issue, include the alert name, condition, trigger choice, and alert time.
- If it is a Weekly Plan issue, include dashboard and plan-input screenshots.

Helpful links

Need	Use
TradingView access or invite issue	Contact support@azrosystems.com with your TradingView username.
Chart or alert setup issue	Check Start Here, Alert Setup Card, and Quick Reference first.
Weekly Plan recordkeeping	Use the Weekly Strategy Tracker and keep weekly notes.
Legal, tax, custody, or exchange advice	Use your own qualified professional. AZRO docs are educational and non-custodial.

Common preventable errors

Most support loops come from stale setup

Wrong account, wrong timeframe, stale alerts after an update, changed plan inputs without a new Start date, and using optional context labels as if they were trade commands.

Support email checklist

- TradingView username included.
- Chart symbol and timeframe included.
- Screenshots attached.
- What you expected versus what happened, written in one or two sentences.
